

BR1200 Static Bar

Static Control by Static Clean

AAA Press International is an authorized distributor of Static Clean products.

Contact and separation between two surfaces creates static electricity, which often causes materials like paper, plastic, textiles and other non-conductive materials to randomly attract to or repel from themselves or their surroundings. In a manufacturing environment this causes process problems which include jams, clogs, miss-feeds, poor stacking, reduced transport speeds, shocks to operators, fires, explosions, and a variety of contamination related problems.

The BR1200 is a “shockless” static neutralizing bar designed to help you control these troublesome and costly problems by neutralizing the static electricity that causes them.

End view

Round body design enables users to “aim” the emitter points as needed. Improves mounting flexibility, too.

Technical data

Round: .75” diameter

Overall length: 6” to 144”

Effective length: 3” to 141”

Ionizing point spacing: .75” on center

Optimum range: .75” to 3” or more

Mounting: Loop clamps

Certification: UL, CE

High voltage: 25KVDC, 105C, UL VW-1

Cable: Standard length 72” alpha shielded cable. Terminated in a user installed a spring-loaded connector to mate with TSN 70 to 75 or comparable power supply.
