

## Motorized Portable Roll Lifter

# e-lift

### RL-1000E Electric Roll Lifter

The E-lift RL-1000 is an effortless method of lifting, transporting, loading and un-loading rolls on & off presses, rewinders & converting equipment. The heavy duty motorized winch with re-chargeable marine battery promotes fast & easy roll handling by an operator of virtually size. Simple push-button operation quickly actuates the core lift boom up or down for effortless roll lifting.

Reduce loss time injuries caused by heavy lifting and repetitive motion with the E-lift Motorized Electric Portable Roll Loader. Manual roll lifting is typical for most pressrooms, however constant manual actuation of the winch can contribute negatively to carpal tunnel syndrome and aggravate previous shoulder, back and arm injuries. The E-lifts' ergonomic design and eye level controls allow operators to position, load and un-load rolls from an upright, standing position reducing the probability of back fatigue and injury. The low friction wheels and extendable front legs make transporting rolls around the converting room floor a simple task.

#### Features:

- Heavy-duty motorized winch capable of lifting 950 lbs.
- High capacity re-chargeable 12-volt marine battery with 110 amp hours for maximum lifting power
- 70 minute continuous operation between charges.
- Optional light-weight pulsed battery charger for fast charging and maximum battery life
- Eye-level battery life indicator
- Extendable front legs for different roll widths & loading positions
- Zero-turn radius for maneuvering rolls in tight places
- Automatic safety brake on boom carriage and winch motor

#### Specifications:

- 950 pound maximum roll lifting capacity
- Use with 3" or 6" ID cores
- 16" maximum roll width
- 40" maximum outside roll diameter
- 56" maximum core lift height
