

## RL-1000 Portable Roll Lifter

The I-Lift RL-1000 is ideal for lifting and loading rolls on & off presses, rewinders & converting equipment. The versatile I-Lift is built tough for trouble free roll lifting and is manufactured using only the highest quality materials.

This rugged roll lifter is an all-steel, ergonomic roll lifting device that offers a smooth reversible crank-style winch, low-inertia casters, simple detachable core lift boom and ideal height operator handles allowing operators to stand upright while raising, lowering, transporting & loading rolls, reducing the probability of personal injury. The low friction wheels and optimal footprint make moving rolls around the shop floor a snap. The I-Lift is equipped with a dual safety brake and requires very little maintenance.

### Features:

- Extendable legs for different roll widths and loading positions
- Durable roller-ball boom with safety pin for loading, unloading & transporting rolls
- Zero-turn radius for maneuvering rolls in tight places
- Automatic safety brake on boom carriage
- Reversible crank-style winch with automatic load brake
- All steel construction for longevity and worry-free operation

### Specifications:

- 950 pound maximum roll lifting capacity
- Use with 3" or 6" ID cores
- 16" maximum roll width
- 40" maximum outside roll diameter
- 56" maximum core lift height
